

Ubair Noor

FRONT END DEVELOPER

SUMMARY

Hey there! I'm a dynamic developer with a passion for crafting cutting-edge tech solutions. With a robust skill set in Node.js, React.js, and JavaScript, I've led projects ranging from media streaming applications to e-commerce platforms, delivering top-notch results every time. My track record includes building a media service web app with React.js and Material UI for seamless song streaming, as well as developing a free movie-watching app using React Native. I've also showcased my prowess in front-end development by creating captivating landing pages using HTML and CSS, like the ones featured on Dribbble. Let's collaborate and bring your ideas to life with innovation and flair! Check out my work on GitHub to see the magic in action.

EDUCATION

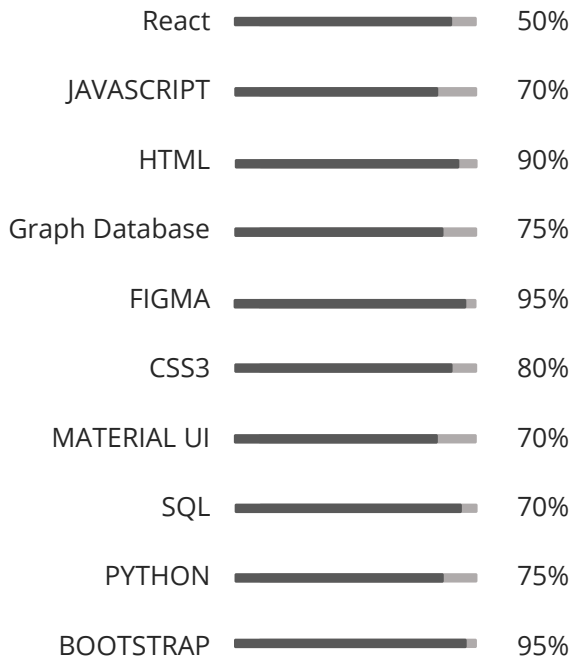

University Of Kashmir

Bachelor of Computer Engineering(7.5/9.5)

International Islamic University Malaysia

Master of Computing in computer Science and information Technology(Research)
